THE AIM OF THE GAME

The aim of the 'Lucky Symbols' side wager is to correctly guess which symbol will be displayed on the 'Lucky Symbols' game reel, shown on the winning number display, at the end of each spin.

Each symbol has a different payout amount associated with it, and there is no limit to the number of symbols a player can bet on in any one game.

The winning 'Lucky Symbol' is independent of previous game results and the game winning number.

THE PLAY

Lucky Symbol wagers are placed at the same time as normal Roulette bets, once the dealer spins the ball, the Lucky Symbol reels will also start turning.

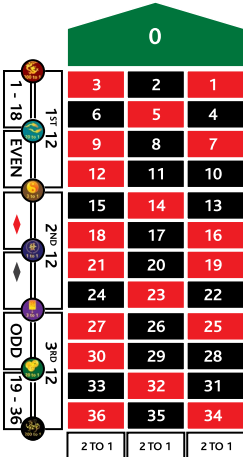

Once the ball has come to rest, the winning number will be confirmed on the winning number display, together with the winning 'Lucky Symbol' on the reel graphic.

The dealer will clear all non-winning bets, and will pay all winning 'Lucky Symbol' bets as per the payout table displayed on the layout for each symbol.

PAYOUTS

All bets on Lucky Symbols are straight up and paid according to the payout odds table below:

Symbol	Symbol Name	Odds Paid

The roulette wheel layout includes a green zero (0) at the top, a black zero (00) at the bottom, and a black zero-zero (000) at the bottom. The numbers 1-18 are labeled as EVEN, and 19-36 are labeled as ODD. The wheel is divided into three sections: 1st 12, 2nd 12, and 3rd 12. The numbers 1-36 are arranged in a grid pattern, alternating between red and black pockets. The numbers 0, 00, and 000 are in green pockets.
